

## **Mac OS X Disaster Relief: Jaguar Supplement Password Info**

The password needed to decode the Jaguar Supplement file is:

**The first word (not counting the header) on page 250 of *Mac OS X Disaster Relief*. The password is case-sensitive.**

Note:

The point of having a password is to limit access to the Supplement to people who have purchased the book. True, it would not be too difficult to go to a book store and "look up" the password - without buying the book. Still, I am hopeful that the password will encourage people to be honest and not do this. But hey, if you do go to a bookstore to check out the password, there's a good chance you will be so impressed with the book that you will buy it. That would be fine too. :)

**The Jaguar Supplement is an update to the first edition of *Mac OS X Disaster Relief* (Peachpit 2002) by Ted Landau. It covers what is new and different in Jaguar (Mac OS X 10.2).**

The Supplement is also included as part of an ***Updated Edition*** of the book, published in January 2003.

The *Updated Edition* also fixes all the errata in the original text, as detailed on this page: <http://www.tlandau.com/backpages/relieferr.shtml>.

If you wish to purchase the *Updated Edition*, it is (or will be) available at most retail outlets (such as Borders and Barnes & Noble) as well as online (such as at Amazon.com).

The following Web page has more details about the book, including links for ordering it online: <http://www.tlandau.com/osxrelief.shtml>.

If you have any comments, additions, or corrections you wish to make regarding the Supplement, please email me at [ted@tlandau.com](mailto:ted@tlandau.com).

For information about the *Mac OS X Disaster Relief seminars*, check this page: <http://macseminars.com/topic/osxdisaster>.
